

This document shows how to add Expanse to the Imprivata Button Manager. This allows access to Expanse at the facility and via remote desktop

- From your Launchpad, click on button manager at the top left

- ✓ This will open a list of applications you can add to your Launchpad for Single Sign On use (automatic login)
- ✓ Scroll down to the "Expanse" option and check this box. This will add Expanse to your launchpad

- ✓ Then click Save & Close. Your button manager will now have Expanse saved as seen below. You can now launch Expanse from your Launchpad and your credentials (3-4ID@hca.corpad.net) should load automatically
