

Recently Accessed Patient List Enhancement

Beginning March 21st, Providers will see an increased number of patients appearing on their Recently Accessed Patient List. The number of patients that can appear on this list will increase from 15 to 40.

The screenshot shows the EHR interface with a top navigation bar containing icons for Chart, Document, Orders, Discharge, Sign, Workload, Menu, and Close. Below the navigation bar is a search bar labeled 'Find Patient' and a 'My Workload' tab. The 'Recently Accessed' list is highlighted with a red box. It contains the following data:

| Name (Preferred) | Visit Date | Close Chart |
|------------------------------|------------|-------------|
| cTraining, PatientTwentyfive | 11/22/22 | |
| PHATEST, PORTSMOUTH | | |
| cTraining, PatientNine | 12/10/22 | |
| VVC, JEANINE | 03/08/23 | |
| PDGRIFFIN, DEBBIE S I | 03/14/23 | |
| cTraining, PatientThirteen | 11/12/22 | |
| TEST, AUC | | |
| cTraining, PatientOne | 12/10/22 | |
| EAC, TRAINEE1 | | |

A red arrow points to the 'NOTE' button next to the patient entry 'cTraining, PatientTwentyfive'.

Note: If a patient is on a provider's Recently Accessed list, the provider will not receive the Unassociated Visit Alert when accessing that patient's chart. By increasing this number, providers should see a decrease in the number of Unassociated Visit Alerts they receive.
